Open to relocation | Available for work visa sponsorship

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience in **Generative AI, Large Language Models (LLMs)**, and **AI driven automation**, seeking an on-site opportunity. Skilled in building and deploying **production-ready AI solutions** using Python, LangChain, RAG pipelines, and cloud infrastructure. Strong focus on **business automation, enterprise AI workflows, and scalable systems** aligned with Vision 2030 initiatives.

TECHNICAL SKILLS

Artificial Intelligence & ML

- Machine Learning
- Deep Learning
- NLP
- Scikit-learn
- Generative AI
- LLMs
- RAG Pipelines
- AI Automation

Frameworks & Tools

- Python
- LangChain
- Groq
- OpenAI
- Hugging Face
- FAISS
- Pinecone
- ChromaDB

Backend & APIs

- FastAPI
- Flask
- Django
- REST APIs

Cloud & Deployment

- Docker
- AWS
- DigitalOcean
- VPS
- Nginx

Databases & Data

- PostgreSQL
- MongoDB
- Vector Databases

PROFESSIONAL EXPERIENCE

GENERATIVE AI ENGINEER 05/2025 to Present
Erly-Stage Studio, United Kingdom, (Remote)

Contributed to the development of **AI-powered SaaS applications** using LLMs and multi-agent workflows. Built **document intelligence pipelines** for PDFs, images, audio, and video using OCR, NLP, and embeddings. Implemented **RAG-based search and chat systems**, improving response relevance and accuracy. Developed scalable APIs and AI workflows focused on **automation and business productivity**.

AI ENGINEER 03/2022 to 04/2025

Xabta, United States, (Remote)

Developed and deployed **AI-powered applications** for NLP and computer vision. Built a **Generative AI chatbot** using LangChain and RAG, improving response accuracy by **~80%**. Created **OCR-based document automation tools**, reducing manual processing time by **~70%**. Assisted in deploying AI services on cloud infrastructure for production use.

FREELANCE AI ENGINEER 01/2023 to Present

Fiverr & Upwork

Delivered custom **AI, LLM, and automation solutions** for international clients. Built AI-based video and document analysis tools used by 1,000+ users. Worked on **data extraction, AI-powered scraping, and workflow automation projects**.

PROJECTS

XAP – AI-Powered Calendar Assistant

- Developed a conversational AI assistant for scheduling via WhatsApp.
- Integrated LLMs with calendar APIs to automate scheduling and availability checks.
- Focused on **real-world business automation use cases**.

Baxter – AI Document Screening Platform

- Built an AI system to analyze and screen PDFs, images, audio, and video.
- Implemented vector search and relevance filtering using FAISS and LLMs.
- Enabled exportable insights for enterprise research workflows.

IqbalAI – Educational AI Platform

- Developed an AI-powered platform for lesson planning and document-based Q&A.
- Implemented semantic search using embeddings and vector databases.
- Deployed a production-ready system with authentication and role-based access.

EDUCATION

Hazara University, Mansehra, Khyber Pakhtunkhwa, Pakistan

Bachelor of Science, Artificial Intelligence

CGPA: 3.80 / 4.00

CERTIFICATIONS

Machine Learning – XABTA Pvt Ltd

Generative AI – Dynot

Python Programming – XABTA Pvt Ltd
